中文譯本是根据1961的英文第二版---

新約綜覽 / 滕慕理著 ; 陳濟民編輯.

香港 : 宣道, 1976.

Many good reviews of this book----

Liefeld wrote in *The Lutheran Quarterly*:

“The author of this volume serves as dean of the Wheaton College Graduate School, having previously served as professor of New Testament at both Gordon College of Theology and Missions, in Boston, and at Wheaton College.

He sets as his primary task a survey presentation of the total New Testament world scene—social, economic, political, and religious—in which historical context the New Testament writings may be seen in their fullest significance. At the same time, he is concerned with their timeless message for the spiritual needs of every generation.

This publication is particularly designed as a textbook for the college or seminary classroom in the area of New Testament survey. Suggested outlines for each of the books, and a variety of tabulated appendix material add utility for such use. In harmony with his intent, the writer wisely restricts the treatment of introductory technical problems in order to keep central focus on the content of the writings. Extensive bibliographical helps direct the reader with more specialist interest to ampler discussion of these matters elsewhere.

One would expect a volume unofficially representing Wheaton College to incorporate conservative presuppositions; such expectations are consistently confirmed. In the matter of authorship of the Gospels, for example, Mr. Tenney accepts, without dogmatizing, the traditional author-assignment in each case. In crediting the Fourth Gospel to the Apostle John, there is not even reference made to the unavoidably qualifying testimony of chapter 21. In a brief, nontechnical summary of the Synoptic problem he offers no solutions, rather maintaining a skeptical disposition over against the proposals of all the source analysts.

We especially commend this volume for its simple fluency, its consistent adherence to purpose, and its vital and evangelical dealing with revelation.”

Yarbrough wrote in the *Journal of The Evangelical Theological Society*

“Thus Dunnnett's work is truly a revision, and one that decidedly improves on an already popular mainstay of many a NT survey class. In addition to what has been said already the expanded bibliographies, helpfully moved from the back of the book to the end of each chapter,

will be more than ample for the average user, and most important new titles are usually included. Maps, charts and illustrations have also been improved or moved to more appropriate locations.

Tenney's work thus continues to be of value for its wonted applications (especially survey courses). Other books are in certain respects or at given points preferable to this one for the application just noted, but few if any consistently combine Tenney's serious-minded quest for truth (and therefore solid results) with his well-known spiritual fervor. Here is an object lesson in how active faith and piercing reason may be wed in the pursuit of a grasp of those phenomena and verities through which the Church first sprang to life. In terms of method alone, Tenney (assisted now by Dunnett) has much to offer the student—and probably teacher too.

In a personal letter Tenney observed: "If scholarship is only a profession, it is simply the dissemination of knowledge which is from the first doomed to obsolescence. If it is a mission, it means the enlightening and stimulation of generations to come as its results affect their lives." Tenney's scholarship was his mission, and his book in this revamped form will deservedly continue to produce the results he predicted."

Many good reviews of this book--

De Silva wrote in *Christian Century*: "(they) present an introduction to the New Testament that is truly daring in its conservatism. ... The book offers an important critique of the results and methodology of higher criticism. ... This introduction remains an exciting work that will be appreciated by conservative students. It would be well used in any introduction to NT course."

Elowsky wrote in *Concordia Journal*: "This introduction to the NT is a breath of fresh air. The book is written for the first and the second year (seminary) students, although this reviewer did utilize the text for a course taught to lay people. ... This introduction, on the whole, is fairly

conservative in outlook, extensive in the topics it covers, but also manageable in the amount and presentation of information."

Blok wrote in Reformed Review: "They have produced a work that is indeed a masterpiece of Evangelical scholarship. They demonstrate that profound learning can be communicated in words that unsophisticated people can read and understand. Their stance is evangelical, while at the same time they treat the views of those who differ from them with respect."

Blomberg wrote in Themelios: "(they) have teamed up to produce a one-volume work which is detailed yet succinct, fully abreast of current scholarship yet thoroughly evangelical, and stylistically clearer for students and teacher alike."
